Independently owned, Nectar Meditech Company was founded to develop a BRAND of hospital-related surgical and non-surgical products, surgical implants, and surgical instruments that drew on the experience and knowledge of the company's directors, two doctors.

Nectar Meditech was founded in 2017 as a strategically diversified firm that first focused on the field of orthopaedic implants. It is run by two doctors with a combined experience of more than 15 years; one is a consultant anesthesiologist and the other is a family doctor.

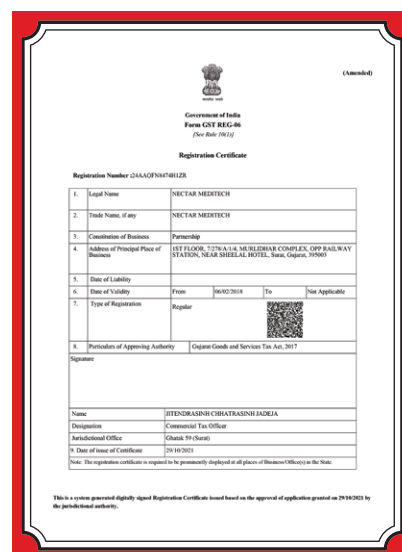

Because of their keen insight and imaginative vision for hospital-related items, the company is able to meet every need for high-standard, high-quality products among doctors and hospitals.

As the company's director and an anaesthesia consultant who has been working in India for the past 16 years, Dr. Rajesh Vekariya has extensive experience working in a variety of hospitals and has strong ties to surgeons. Nobody understands the needs of surgeons better than him, so after years of deliberation, he decided to launch Nectar Meditech with the goal of providing QUALITY products for patients, hospitals, and doctors with the best SERVICE by providing product knowledge and optimal utility training with prompt delivery, as well as making sure to stay up to date with the most recent medical knowledge and keep upgrading the standards of our products and offering the most INNOVATIVE products.

After using all of our experience and knowledge to provide the best orthopaedic implants and surgical instruments to our India customers (doctors & hospitals) from 2017 to 2023, we have now entered the international market to deliver our best products with rich medical field-related knowledge to provide the highest quality innovative products with the best service for our overseas customers. We do this by providing orthopaedic implants, surgical instruments, and other medical supplies for every need that a doctor or hospital may have.
